COPYRIGHT 2018

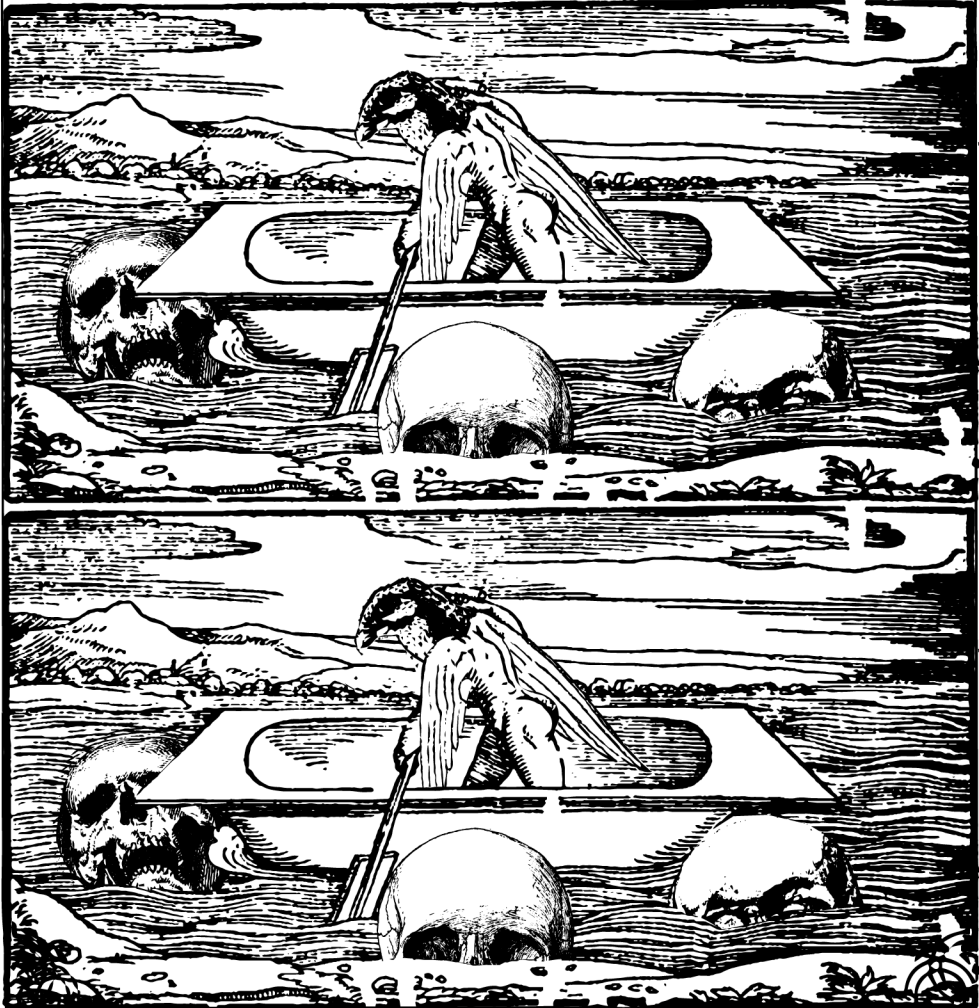

The publisher of RECURRENT TEETH maintains a poorly trained, semi-wild recurrent neural network to act as inspiration for all content printed in this publication. This RNN has been fed descriptions of thousands of artworks and is then run through multiple output cycles and re-trained on its own output. Only the freshest, most absurd artifacts are kept for the next round of training. The result of this process is a neural network that will generate artwork descriptions that are interpreted and published here in
